

Teaching and History of Clay Mineralogy

Organizer: Stephen Altaner, University of Illinois at Urbana-Champaign, USA

Teaching clay mineralogy effectively is critical to the continued success of the field of clay science. Do you have clay science teaching methods or teaching resources that are innovative or effective or both? If so, then please submit an abstract so that these ideas and resources can be useful to others also.

The science of clay mineralogy has a rich past full of interesting and talented individuals and important scientific advances. Many of these individuals and scientific advances continue to have importance today and into the future. Please consider submitting an abstract about the history of clay science.
