MILLERCOMM2019

Nina-Marie Lister

Graduate Program Director
and Professor, School of
Urban and Regional Planning,
Ryerson University

Sweet Water Seas

From Shorelines to Storylines

Thursday
September 13, 2018
5:30 pm

Knight Auditorium, Spurlock Museum
600 South Gregory, Urbana
**University of Illinois
at Urbana-Champaign**

Hosted by:
Department of Landscape Architecture

In conjunction with:
Department of Atmospheric Sciences
Department of Civil & Environmental
Engineering
Department of Entomology
Department of Geography & Geographic
Information Science
Department of Geology
Department of Natural Resources and
Environmental Sciences
Department of Philosophy
Department of Sociology
Department of Urban and Regional Planning
Illinois Program for Research in the
Humanities
Illinois State Water Survey
Institute for Sustainability, Energy, and
Environment (ISEE)
Prairie Research Institute
School of Architecture
School of Art + Design
School of Earth, Society & Environment

Series support provided by:
Office of the Chancellor
Office of Diversity, Equity, and Access
Office of the Provost and Vice Chancellor
for Academic Affairs
Office of the Vice Chancellor for Research
Office of the Vice Chancellor for
Student Affairs
Center for Advanced Study

Professor Lister will reflect on our relationship with the Great Lakes Basin—the land-lake interface specifically—over the last century, and the last 25 years in particular. Through the lens of her own experience living and working on the northern edges of these lakes, she draws insights into the complexity of

this regional, bi-national land-water system, to explore transboundary and transdisciplinary relationships that have shaped the basin, and that reveal strategic interventions that have alternately sacrificed and saved these waters. In unpacking this complexity, she frames the Great Lakes Basin as both litmus and agent of change, and from this, projects forward a renewed agency of design for these “sweet waters,” and our own resilience.

This lecture is part of the
symposium *FRESH WATER: Design
Thinking for Inland Water Territories*
hosted by the Department of
Landscape Architecture, September
13–15, 2018.
